

Abdelaziz Frédéric Ouattara

Aspiring Data Scientist | Machine Learning | NLP | U.S. Air Force HVAC/R Professional

Email: ouatfred24@gmail.com | GitHub: <https://github.com/aouattara-510> | LinkedIn: [linkedin.com/in/ouatfred24](https://www.linkedin.com/in/ouatfred24)

PROFESSIONAL SUMMARY

Aspiring data scientist with a strong technical foundation developed through U.S. Air Force HVAC/R service and graduate-level data science study. Skilled in Python, SQL, machine learning, natural language processing, data visualization, and communicating analytical findings to nontechnical audiences. Brings disciplined troubleshooting, documentation, and mission-focused problem-solving to data-driven projects.

TECHNICAL SKILLS

Programming	Python, SQL
Data Analysis	Pandas, NumPy, data cleaning, exploratory data analysis, feature engineering
Machine Learning	Logistic Regression, Random Forest, classification, regression, clustering, model evaluation
NLP	Text preprocessing, sentiment analysis, TF-IDF, TextBlob
Visualization & Tools	Matplotlib, WordCloud, Jupyter Notebook, Git, GitHub, Visual Studio Code

SELECTED PROJECTS

COVID-19 Twitter Sentiment Analysis

- Analyzed more than 170,000 COVID-19-related tweets to identify positive, neutral, and negative sentiment patterns.
- Cleaned and transformed text data, created TF-IDF features, and compared Logistic Regression and Random Forest models.
- Produced visualizations of sentiment distribution, trends, frequent terms, and hashtags to communicate results clearly.
- Documented methodology, ethics, limitations, and practical implications in a reproducible Jupyter Notebook and presentation.

Hybrid Book Recommendation Engine - Project Design

- Designed a hybrid recommendation workflow combining collaborative filtering and content-based similarity.
- Planned feature engineering using genres, authors, publication year, and TF-IDF representations of summary text.
- Addressed sparse ratings, cold-start users, popularity bias, and recommendation diversity in the project methodology.

Data Mining and Business Analytics

- Completed projects involving classification, regression, clustering, model comparison, and feature engineering.
- Emphasized model interpretability, data storytelling, and alignment between analytical metrics and business decisions.

PROFESSIONAL EXPERIENCE

U.S. Air Force - HVAC/R Professional

- Troubleshoot, maintain, and evaluate complex mechanical and electrical systems in a mission-focused environment.
- Use technical documentation, measurements, and systematic problem-solving to identify faults and support reliable operations.
- Communicate findings clearly, follow safety procedures, and maintain accurate records for maintenance and operational decisions.

EDUCATION

Master of Science in Data Science - Bellevue University

Coursework includes machine learning, data mining, visualization, analytics, and portfolio development.

ADDITIONAL STRENGTHS

Analytical problem-solving • Technical communication • Data ethics • Continuous learning • Team collaboration • Attention to detail
