

Abdelaziz Frédéric Ouattara

Aspiring Data Scientist | Machine Learning | NLP | Analytics
GitHub: github.com/aouattara-510

PROFESSIONAL SUMMARY

Aspiring data scientist with graduate-level experience in Python, SQL, machine learning, natural language processing, data visualization, model evaluation, and ethical data science. Brings disciplined technical troubleshooting and documentation experience from HVAC/R work.

TECHNICAL SKILLS

Python, SQL, pandas, NumPy, scikit-learn, Matplotlib, Jupyter Notebook, Git, GitHub, classification, regression, clustering, TF-IDF, sentiment analysis, feature engineering, cross-validation, model evaluation.

SELECTED PROJECTS

Customer Churn Prediction - compared Logistic Regression, Decision Tree, and Random Forest; selected Logistic Regression with holdout ROC-AUC 0.8413 and recall 0.7834.

COVID-19 Twitter Sentiment Analysis - text cleaning, exploratory analysis, TextBlob sentiment labeling, TF-IDF, Logistic Regression, Random Forest, and responsible-use discussion.

Additional portfolio demonstrations include recommender systems, classification, regression, clustering, PCA, A/B testing, SQL analytics, and time-series forecasting.

EDUCATION

Master of Science in Data Science - Bellevue University.

PROFESSIONAL BACKGROUND

U.S. Air Force HVAC/R professional with experience troubleshooting complex mechanical and electrical systems, using technical documentation, measurements, safety procedures, and systematic problem solving.
